

Third edition
International Summer School

MDD for Distributed Real-time Embedded Systems

Aber Wrac'h - Brittany
from September the 4th to 8th 2006

Sébastien Gérard, Joël Champeau, Jean-Philippe Babau

Sponsored by:

Summer school ideas

- Courses dedicated to several technologies easing model-based development of embedded systems;
- Feedback of various industry experts coming from several domains of embedded systems;
- Closed discussions with people involved in model-based development research.

Improvements (1/2)

- More interactive Summer School :
 - Introduction of exercises:
 - MM specification ? (MM1 CSP-Like and another MM2 language, formal validation, performance evaluation) ?
 - Models (with profile) conform to MM1 or MM2 ?
 - Transformation from MM1 to MM2 ?
 - With or without tools ?

Improvements (2/2)

- More interactive Summer School :
 - Poster and demo session :
 - Shorts presentations at the beginning of the session (3 minutes), to have a global overview of the presented works and tools.
 - Installation of the posters precedent evening.
 - Increase the session time (one day) ?
 - Online publication of the poster with a short paper (2 pages)
 - Organization by PhD Students.

Informations

- Informations on MDD4DRES (<http://www.mdd4dres.info/>):
 - Poster and demo session :
 - Send a link on your work to put on web site.
 - Presentations and list of participants are on the web site.
 - Shuttle at 3pm.

Fourth edition
International Summer School

MDD for Distributed Real-time Embedded Systems

Brest - Brittany
September 2008
